ENDO NOVA CLIP APPLIER

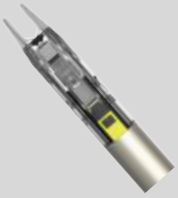

DESCRIPTION

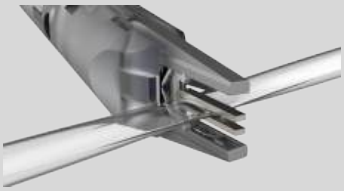

The NOVA Clip Applier is a sterile, single-use endoscopic tool designed for reliable ligation in surgical procedures. Its enhanced jaws and refined design minimize clip scissoring and splitting, offering improved grip and secure clip placement on vessels. Pre-loaded with 20 titanium clips that advance automatically with each use, it fits standard trocars. The shaft is made from a low-glare material to reduce reflections, ensuring better visibility during surgery.

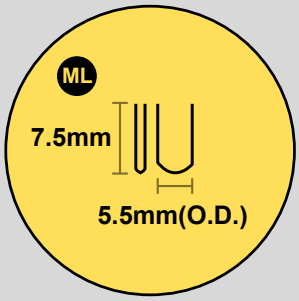

IMPROVED JAW SECURITY
Features jaws stronger than other brands, ensuring unmatched clip formation

REDUCED VESSEL DAMAGE
visual reference of the quantity of clips remaining with last clip lockout feature

ENHANCED CLIP STABILITY
Reduced clip scissoring by ensuring superior vessel clip formation compared to the previous model.

PRODUCT INSIGHTS

- Last clip lockout with indicator bar
- Anti-clip drop ratchet mechanism
- 360° rotation knob/shaft — designed for easy rotation and one-handed use
- The rigid, low-glare shaft minimizes reflection and movement for precision
- Ergonomic handle for easy control
- Inner-crossed pattern of the clip offers a firm hold on the vessel
